

Community Empowerment Collaboration

A Missouri-wide task force

Citizens with low incomes are often unable to meet their basic needs for food, housing, and energy. Education and employment opportunities are not readily available to assure the economic security of their families. Many individuals living in a state of poverty are not aware of available services, especially those

who have been recently impacted by the economic downturn. By working together, we can collaborate on common visions and goals to address the five pillars of poverty: hunger, health, education, housing & energy, and economic family security.

MISSION

The CEC will engage all sectors of the community to work together to address poverty issues locally.

Together, we can create change!

We believe that our communities can improve through increased collaboration among agencies and individuals, our collective knowledge and combined resources.

Community Empowerment Collaboration opens options, resources, and opportunities for individuals and families living with low-incomes.

This program is funded in whole/part with federal American Recovery and Reinvestment Act (ARRA) funds received from the U.S. Department of Health and Human Services (HHS) and provided by the Missouri Department of Social Services, Family Support Division. The funds received from the Family Support Division are all federally funded.
